Membership (All)

Seminar (Fred)

Internet Neutrality (All)

Minutes

New Projects:

(If possible, please review the project descriptions online prior to meeting. You have to log on to access the “Internal” menu)

brochure

seminar

Community Builder

Reading assignments (discuss briefly – address fully February meeting):

Over the years I have generated a bit of verbiage on the local economy and such. Also, Gale White put a lot of work into analyzing Lubec's pros and cons as they relate to commerce, tourism, and residence. Let us not spend more time reinventing wheels. I am placing the documents on the site and categorizing as best I can, while at the same time generating more as the voices in my head instruct me. At least one editor is needed to help organize all this and merge topics addressed multiple times, as well as verify, argue, correct, and comment.

The objective is to accurately and comprehensively describe our community's economic picture (in conjunction with the comprehensive plan etc.) and create a prioritized road map in order to proceed in the long term. Although we intend to focus on one approach, the Internet phenomenon by its very nature requires us to be familiar with myriad issues affecting it.

New Action Items (name, assigned to, deadline):

Internet Neutrality (All)

Summary for Board

Everything else there's time for
